Technology Networking Seminar

Above & Below Ground: Capturing a Smart City in 3D Space

Seminar and Lab Tour

Accurate digital representation of urban areas is instrumental in developing, operating and sustaining smart cities. This seminar will focus on PolyU innovations for generating precise 3D digital models of urban spaces, including those above and below ground. Join us and learn how technological evolution in this area enhances the efficiency of smart city planning as well as surveying, monitoring, 3D imaging and diagnosis for underground utilities.

Guided Tour- Underground Utility Survey Laboratory
 Ever wonder what it looks like under our city's concrete surface? Enter our simulation of an underground space with manholes, valve chambers, pipes and cables, complete with advanced monitoring facilities!
